XKW Series is available in nineteen 1000 watt and 3000 watt models. High frequency conventional PWM switching is used to achieve high power density in compact 19-inch rack packages, 1.75 inches (1 U) high for the 1000 watt model and 3.5 inches (2 U) high for the 3000 watt models.

This series is a good choice for research, product development and production test applications such as R&D, magnet control, product design, ATE, process control, electroplating and burn-in. The highly dependable XKW Series comes with standard analog control and offers isolated analog (ISOL) and GPIB (IEEE 488) programming options.
